Module # Report | CSE 310 C++

|| Rust | | |SQL Relational Databases | |Choose Your Own Adventure | |

Fill Out the Checklist

Complete the following checklist to make sure you completed all parts of the module. Mark your response with **Yes** or **No**. If the answer is **No** then additionally describe what was preventing you from completing this step.

Question	Your Response	Comments
Did you implement the entire set of unique requirements asdescribed in the Module Description document in I-Learn?	Yes-ish	I asked if I could use this module for learning HTML (:
Did you write at least 100 lines of code in your software and include useful comments?	Yes	
Did you use the correct README.md template from the Module Description document in I-Learn?	Yes	
Did you completely populate the README.md template?	Yes	
Did you create the video, publish it on YouTube, and reference it in the README.md file?	Yes	
Did you publish the code with the README.md (in the top-level folder) into a public GitHub repository?	Yes	

Did you complete a Stretch Challenge

If you completed a stretch challenge, describe what you completed.

Record your time

How many hours did you spend on this module and the team project this Sprint? *Include all time including planning, researching, implementation, troubleshooting, documentation, video production, and publishing.*

	Hours
Individual Module	11
Team Project	5

Retrospective

- What learning strategies worked well in this module? Signing up on W3Schools so I could see what sections I'd gone through was really helpful for keeping me on track with my learning

- What strategies (or lack of strategy) did not work well? Deciding to have a second page halfway through did complicate the project quite a bit
- How can you improve in the next module? Next time, I'd like to start out with a more clear set of ideas for this I'd like to include and how I could structure them so I don't have to move stuff around so much.
